JBIS Journal of the British Interplanetary Society

VOLUME 59 2006

Issue No:	*Themes*
1	General Papers
2	Fourth IAA Symposium on Realistic Near-Term Advanced Scientific Space Missions - 1
3/4	Fourth IAA Symposium on Realistic Near-Term Advanced Scientific Space Missions - 2
5	General Papers
6	General Papers
7	General Papers
8	General Papers Solar Power Satellites
9	General Papers Space Elevators
10	General Papers Space Tourism - 1 Orbital Siphons
11	General Papers Space Tourism - 2
12	General Papers

AUTHOR INDEX

Alby F. *et al*	Consequences of Space Debris Mitigation Guidelines on Geostationary Transfer Orbits	3
Augros P. *et al*	Parametric Analysis for Aurora Mars Manned Mission Concept Definition	186
Balint T.S.	Exploring Titan with Multiple Landers	355
Benford G. *et al*	Power-Beaming Concepts for Future Deep Space Exploration	104
Benford G. *et al*	Reducing Solar Sail Escape Times from Earth Orbit Using Beamed Energy	108
Benford J. *et al*	Max-Microwave Acceleration Experiment with Cosmos-1	68
Benford J. *et al*	Elastic, Electrostatic and Spin Deployment of Ultralight Sails	76
Biggiogera M. *et al*	DADLE: A Cue to Human "Hibernation"?	115
Bolonkin A.A. *et al*	A Cable Space Transportation System at the Earth's Poles to Support Exploitation of the Moon	375
Collins P.	The Economic Benefits of Space Tourism	400
Cougnet C. *et al*	Solar Power Satellites for Space Applications	290
Cutter M.A.	A Small Satellite Hyper-Spectral Mission	153
Davies P. *et al*	Ultra Low-Cost Radar	158
De Pascale P. *et al*	Optimal Options for Rendezvous and Impact Missions to NEOs	386
Fawkes S.	The Second Space Race	364
Fearn D.G.	Ion Propulsion: An Enabling Technology for Interstellar Precursor Missions	88
Freitas I. *et al*	Rationale for the use of Melatonin as a Protective Agent Against Cosmic Radiation and Ischemia-Reperfusion Damage in Long Term Spaceflight	124
Fujishita M. *et al*	SETI Activities at Kyushu Tokai University	346
Genta G.	The Challenge of Very Deep Space Exploration: How Far will the Frontier Be?	43
Giorcelli R.J. *et al*	Handling the Effects of Complexity in Space Elevator Requirements	319
Girerd A.R. *et al*	A Model to Assess the Mars Telecommunications Network Relay Robutness	443
Gruntman M.	Solar System Frontier: Exploring the Heliospheric Interface from 1 AU	54
Gruntman M. *et al*	Innovative Explorer Mission to Interstellar Space	71
Harvey B.	Mikhail Tikhonravov (1900-74): His Contribution to the Soviet Lunar and Interplanetary Programme	266
Hempsell M. *et al*	The HAND Nanosatellite Project	167
Hempsell M.	Mission Capture with a Multi-Role Capsule	194
Hempsell M.	Space Tourism in the Context of a Diverse Market	411
Hetesi Z. *et al*	A New Interpretation of Drake-Equation	11
Johnson L. *et al*	NASA's In-Space Propulsion Technology Program: A Step Toward Interstellar Exploration	99
Kammash T.	Antiproton Powered Gas Core Fission Rocket	23
Kennedy A.	Interstellar Travel: The Wait Calculation and the Incentive Trap of Progress	239
Lansdorp B. *et al*	Design for a Mars Surface Habitat with Parts made from Locally Produced Glass	313
Long K.F.	The Primordial Black Hole Criticality of the Universe	146
Lorenz R.D.	Spin of Planetary Probes in Atmospheric Flight	273
Maccone C.	Relativistic Optimized Link by KLT	94
Maccone C.	Past and Future of Astronomy and SETI Cast in Maths	283
Malatesta M.	The Cell Nucleus in Physiological and Experimentally Induced Hypometabolism	130
Matloff G.L. *et al*	Near-Term Interstellar Sailing	59
Matloff G.L.	The Beryllium Hollow-Body Solar Sail and Interstellar Travel	349
Mazza C.	ESCA, A New Form of International Co-Operation	112
McInnes C.R. *et al*	The Orbital Siphon: A New Space Elevator Concept	368
Morrow M.T. *et al*	Exploring Titan with Autonomous, Bouyancy Driven Gliders	27
O'Donnell K.A. *et al*	Resonant Orbit Locations about Celestial Bodies	15
Palchykova S. *et al*	Sleep, Torpor and Memory Impairment	134
Parkinson B.	A Ceres Micromission using Electric Propulsion	306
Parkinson B.	How to Make Money out of RLVs	395
Parkinson B.	A Parametric Investigation of the Economics of Space Tourism	417
Pinto F.	Progress in Quantum Vacuum Engineering Propulsion	247
Pottinger S.J. *et al*	Electric Propulsion Research at the University of Southampton	176
Pullum L. *et al*	Space Elevator's Preliminary Architectural View	324
Santoli S.	Nanobiomimetic Active Shape Control: Fluidic and Swarm-Intelligence Embodiments for Planetary Exploration	63
Shechtman I.	Is the Universe Teeming with Super Civilizations?	257
Shmatov M.L.	The Expected Efficiency of Burning of the D-He^3 Fuel in Space Propulsion Systems	35
Siddiqi A. *et al*	Reconfigurability in Planetary Surface Vehicles: Modelling Approaches and Case Study	450
Singer D.	Human Hibernation for Space Flight: Utopistic Vision o Realistic Possibility?	139
Somma R.	Cassini/Huygens: The Italian Contribution to a Successful Mission	82
Strijkstra A.M.	Good and Bad in the Hibernating Brain	119
Stroud K.J. *et al*	Spacecraft Design Considerations for Piloted Reentry and Landing	426
Summerer L. *et al*	Roles of Solar Power from Space for Europe: Space Explorations and Combinations with Terrestrial Solar Power Plant Concepts	297
Swan C. *et al*	Safe Space Elevator – An Expectation to be met Through A System Architecture Approach	331

AUTHOR INDEX - Contd

Swan C. *et al*	Space Elevator Base Leg-Architecture	338
Ulivi P.	ESRO and the Deep Space: European Planetary Exploration Planning Before ESA	204
Vulpetti G.	The Sailcraft Splitting Concept	48
Woodcock G.	High-Power Solar Electric Propulsion for Human Exploration Missions	230
Zampino E.J.	Warp-Drive Metrics and the Yilmaz Theory	226

SUBJECT INDEX

Aerocapture 99
Antimatter 23
Asteroids
  missions 306, 386
Astronomy
  SETI 283
Attitude control 426
Aurora programme 186
Black holes 146
Capsule - manned 194, 426
Cassini/Huygens 82, 273
Ceres 306
Communications 94, 108, 443
Control systems 108, 450
Cosmology 146
Cosmos-1 68
Disorientation
  landing task 426
Drake equation 11
Earth observation 153, 158
Economics 239, 395, 400, 411, 417
ECSA 112
Europe
  space missions 112, 204
Excalibur 194
Fermi paradox 257
Glider 27
HAND nanosatellite 167
Heliosphere 54
Hibernation 115, 119, 124, 130, 134, 139
History 239, 266, 283, 364
Infrastructure
  Earth-Moon cable 375
  manned capsule 194
  manned Mars exploration 313
  Orbital Siphon 368
  planetary surface vehicle 450
  solar power satellites 290, 297
  space elevator 319, 324, 331, 338
Interstellar medium 54, 71
Interstellar propulsion 35, 349
Interstellar travel 48, 59, 94, 99, 104, 239
Launch vehicles
  cable launch 368
  reusable 395,411,417
Life sciences
  hibernation 115, 119, 124, 130, 134, 139
  radiation protection 124
  sleep 134
  spatial disorientation 426
Manned spaceflight
  capsule 194, 426
  deep-space missions 43
  hibernation 139
  landing task 426
  Mars missions 186
  planetary surface vehicle 450
  physiology 130, 139, 426
  solar electric 230
  tourism 364, 395, 400, 411, 417
Mars
  manned missions 186, 313
  resources 313
  telecommunications network 443
Microsatellites 158,167
Moon
  cable 375
Nanotechnology 63
Orbital mechanics 3, 15, 108, 368, 386
Orbital Siphon 368
Pioneer-Venus 204
Planets
  Mars 186
  robotic exploration 194, 273
  Saturn 82
PROBA 153
Propulsion methods
  antiproton gas core 23
  atmospheric 27
  beam-ride sails 104, 108
  cable 368, 375
  electric 71, 88, 99, 176, 230, 306
  nuclear pulse 35
  Solar sail 48, 59, 68, 76, 99, 104, 349
  space elevator 319, 324, 331, 338
  vacuum energy 247
  warp drive 226
Radio telescope 346
Relativity 94, 226
Robotics 63
RTG power system 355
Satellites
  Earth observation 153, 158
  orbital resonance 15
Saturn 82
SETI
  Drake equation 11
  Fermi paradox 257
  history 283
  methods 346
Solar sail 48, 59, 68, 76, 99, 104, 349
Space debris 3
Space elevator 319, 324, 331, 338
Space education 158
Solar power satellites 290, 297
Space probes 27, 43, 59, 63, 71, 194, 273, 306, 355
Systems engineering
  space elevator 319, 324, 331, 338
Tikhonravov, Mikhail 266
Titan 27, 82
Tourism 364, 395, 400, 411, 417
Triton 355
Ulysses 204
USSR 266
